

# PORT OF ANACORTES

## ANACORTES, WA

### 120'X260' (31,200 SQ. FT.) CONTAINMENT FACILITY

**NEED:** To clean up, dredge and transport contaminated soils from the coastal shoreline.

**SOLUTION:** Vision Building Systems was contracted to construct an engineered on-site containment facility for the storage and transfer of the contaminated soils.

#### **FEATURES:**

- The Engineered Structure met 100 mph wind loads and 25 lbs. snow load per local building codes
- 5' high portable, concrete containment wall
- Ventilation fans to exhume the heavy equipment exhaust
- 16' x 16' steel overhead doors with electronic operators
- Completed in 60 days from contract signature
- Leased to the Port of Anacortes over the duration of the estimated 2 year
